Dear Mr. Arikawa,

Next week I will be visiting Japan again. This time the visit is arranged through Sumitomo company, and I am coming with 4 more Israel Aircraft people to present to Sumitomo and to many other companies our technology and our products, hoping that we will be able to initiate technological and commercial relations with the Japanese industry.

Since we have completed few weeks ago the demonstration program of automatic landing for UAVs using Fuzzy Logic, I will present this technology too. The project was very successful, and we appreciate your help during your stay here. I am bringing with me a video cassette of the flight tests.

It is possible that we will stay one or two days in Osaka, but I do not have the itinerary yet. In Tokyo I will stay at the President Hotel (03-3497-0111, fax: 03-3401-4816). I will arrive there on the 16th night. I will try to be in touch with you if we have any chance to meet. I am also sending a fax to Prof. Mizumoto.

Sincerely yours,

Uri Soudak

Mr. Haruhiko ARIKAWA
ARK TECHNO-RESEARCH Inc.
Kyoto 612
JAPAN

Dear Mr. ARIKAWA,

I want herein to thank you for the fruitful work you have been doing with us here (in ISRAEL), on our development project in the field of Fuzzy Logic.

The field of Fuzzy Logic was new for us and you helped us in understanding it better.

Also I am very much impressed from ARK's fuzzy system which you have demonstrated and explained, of how it can be used in developing fuzzy control systems, its inference capabilities and speed.

I hope that we shall have opportunity to cooperate with ARK in the future.
