DEER PLACENTA

(50:1) 200mg

Deer Placenta is very similar to the human placenta in terms of chemical and biological construction, which is widely accepted as the main source of placenta today. The deer or “Divine Creature” is perceived to be a valuable animal, thus food related to the deer is also considered to be nutritious tonics. In the history of Chinese medicine, body organs of the deer (like pizzle, testicles, blood, velvet, heart and tail) are regarded as rare medicinal herbs.

自古就有“鹿身百宝”之说...

《本草纲目》鹿胎盘小故事

话说在盛唐时期，有一次，唐玄宗带队外出打猎，在狩猎的过程中，无意中发现一只母鹿在分娩一只小鹿后，居然把自己的胎盘给吃掉，玄宗大惑不解，于是叫来随驾御医，御医据实禀报！

受此现象启发，御医决心为皇上研发一款可以延年益寿，养颜美容的珍品。于是，经过了多年的潜心研究，无数次的翻阅古书，无数次的往返于林间，无数次的写下了数种配方。

终于，产品问世了！

但任何新产品的问世终究需要数百次的“临床验证”，于是，御医让数位“面色不雅”的宫女尝试服用，静待其效果。

数月后，令人惊喜的效果终于体现在这些宫女的脸上，精神上以及她们欣喜若狂的表情上，一个个面色红润，富有光泽，体态轻盈，宛若桃花。于是，这件“奇事”在宫中传开了，无数嫔妃都在寻求此珍品。

终于，还是传到了杨贵妃耳中，也随即禀报了皇上。一听此事，龙颜大怒——宣御医！

“身为御医，你可知罪？”

“臣不解，臣何罪之有，请皇上明示！”

于是，皇帝道出此事，御医一听此事，大舒一口气，于是向皇上禀明了此事缘由！于是，此佳品，也献给了皇上及杨贵妃！

数月后，精力充沛的皇上脸色红润，富有光泽的杨贵妃宣召了御医，龙颜大悦之下，赐御医“回春御医”称号，并下令将此配方载入史册，以益后人...

鹿血

性味：味甘，咸，热。功效：补虚，和血，治虚损腰痛，心悸，失眠，肺痿吐血，崩中，带下，生血，治痢，主狂犬伤。

鹿胎

PRODUCT OF
HIGH TECHNOLOGY

A good health supplement with great formula requires high technology to contain and preserve the nutrients, ensuring that they are not lost or easily destroyed by various external factors, as well as facilitate the effective absorption of nutrients to achieve maximum efficacy.

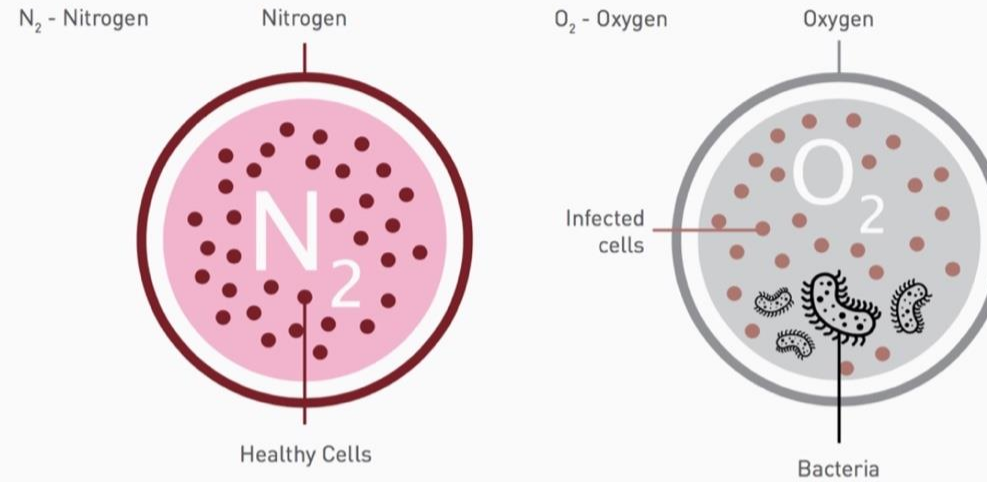

FREEZE-DRYING TECHNOLOGY

Advanced Freeze-Drying Technology can help to preserve live cells and maintain their bioactive for up to 3 to 4 years. PURTIER Placenta extracts only from fresh Deer Placenta, and uses the latest Freeze-Drying Technology to preserve the highest bioactive benefits.

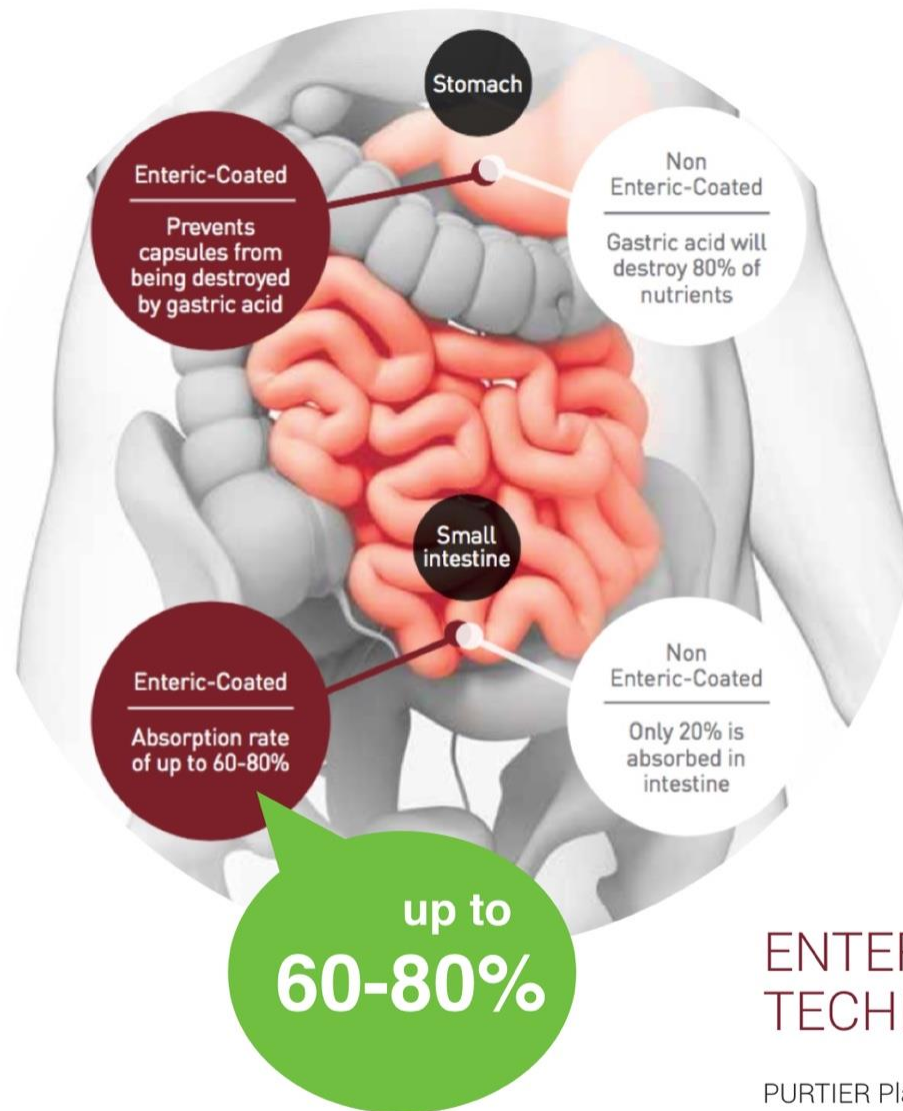

EMULSIFICATION TECHNOLOGY

The modern Emulsification Technology allows larger molecules to be fully absorbed during the chylomicron process.

NITROGEN-FILLED TECHNOLOGY

PURTIER Placenta live cells and other nutrients will be oxidised and deteriorated when in contact with free radicals, oxygen, bacteria and UV rays during the conventional capsulation process. Nitrogen-filled technology is integrated to prevent the decomposition of living cells and other nutrients, as it ensures zero oxygen in the capsulation process. Therefore, PURTIER Placenta is a “living capsule” whereby the placenta cells are biologically active and providing the greatest effectiveness to the body.

ENTERIC-COATED TECHNOLOGY

PURTIER Placenta's high quality enteric coating prevents the capsules from being destroyed by gastric acid and losing their nutrients during transportation to the small intestine, and ensuring that the capsules dissolve in the small intestine where absorption of nutrients is the highest, which boosts the absorption rate of effective ingredients up to 60-80%.

马来西亚, 张瑞安65岁, 5年前发生一场严重车祸, 汽车铁片插入额头, 把眼球旁边的神经线给弄断了, 造成右眼瞎左手废, 记忆力也受损.

经过四位医生的证实, 政府分发一张专为不幸人士而设的 Orang Kurang Upaya 卡给张先生, 以方便他出入使用.

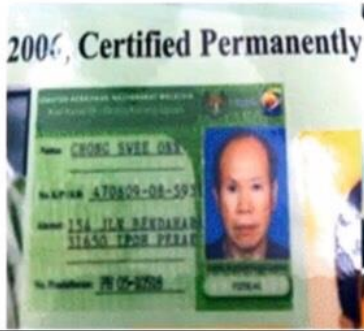

五个月后的一个早晨, 他忽然发现他的右眼看得见地上的一张纸, 经过医生验证后, 不仅证实他的右已复明, 已残废的左手也逐渐康复.
